

Put microbes on the outside of
(beautiful) to protect from
viruses - mask

Hot
Reiz

Fire

Plant Robotic
AI arms

Leaf earrings

Smog/Smoke

AR glasses that alert me
to air quality, where
active fires are

Can it help
change

Clothes can adapt material to
environment → responds to
input about air quality, temp,
and can expand/shrink
thruing to regulate core
temp.

Flower/Plant
Accessories to help
produce more
oxygen/absorb
carbon dioxide

In this future 80% of
vegetation has been destroyed. Humans
are using AI + AR technology to
monitor & adapt to the world around
them. Clothing material can modify to help
regulate core body temp & wearable
plants help allow humans to walk mask/
oxygen free. Headwear can act as emergency
oxygen input.
